

CHINT POWER String Inverters

CHINT POWER Inverters manufactured by one of the leading inverter manufacturing companies based in CHINA and North America. CHINT POWER .brand in the field of renewable energy is founded on 30 years of manufacturing experience with solid research and development resources.

Basic Characteristics of CHINT POWER Inverters

- International award winning inverter for best design having high efficiency of 97.4%
- Wide MPP ranging from 430 to 800V with maximum input voltage of 1,000V
- High degree of protection type IP65 with permissible temperature extends from -25 to +60C
- Low investment coupled with high profit maintenance warranty
- User-friendly installation & interface, professional industrial design, and design-for-reliability mechanism.
- High communicative ability with provision of optional DC switch, and GPRS/Wi-Fi / RS485 wireless communication facilities embedded to the inverter.
