

# SolaX String Inverters

SolaX String Inverters is one of the leading international brands made in China and presently sold in more than 47 countries worldwide via over 200 distribution channels.

## Basic Characteristics of SolaX Inverters

- High efficiency of inverters up to 98.3%
- Maximum DC input voltage of 1000V and wide MPPT voltage range and two MPPT trackers, operating voltage up to 850V.
- On line system monitoring facility.
- Secure and reliable software and hardware protection
- Equipped with multiple protection devices such as overvoltage, under voltage, anti-islanding, overload, over temperature to name a few.
- High protection class IP65.
